Winnenden, July 2021 – Kärcher is extending the range of its cordless devices with two new battery-powered vacuum cleaners, which are offered with different equipment. Whether singles, couples or families, they all find the idea of having a light vacuum cleaner in the household practical, as it is quickly ready for use and suitable for quick intermediate cleaning, as well as for the weekly house cleaning. With the VC 4 Cordless myHome and VC 6 Cordless ourFamily battery-powered vacuum cleaners, Kärcher satisfies the desire for such flexible devices and provides a solution for every household. The devices are so powerful and durable that they can compete effortlessly with corded vacuum cleaners without problem. Without bothersome cables and without a device to be dragged along, both models offer maximum freedom of movement.

KÄRCHER

The Kärcher logo consists of the word "KÄRCHER" in a bold, black, sans-serif font. Below the text is a thick, horizontal yellow bar.

PRESS RELEASE

Whereas the fully charged VC 4 Cordless myHome can reach a period of use of around half an hour, the more powerful model VC 6 Cordless ourFamily achieves a runtime of approx. 50 minutes. This device is also equipped with a highly effective HEPA 12 filter (EN 1822:1998), which retains even the tiniest dirt particles. The bagless filter system of the two vacuum cleaners can be emptied quickly and simply, and eliminates the need to purchase replacement filters.

The entire technology – battery, suction turbine, filter and the dirt container – is accommodated in the very compact handpiece. The battery charge level can also be read off here. For minor cleaning tasks, the devices can be quickly converted to handheld vacuum cleaners by detaching the suction tube.

The suction power can be adjusted to different surfaces and kinds of dirt in two stages and with an additional turbo mode. The active floor nozzle of the vacuum cleaner is driven by its own electric motor – for even more effective dirt pick-up on hard floors and on textile surfaces. All available floor nozzles have an impact guard made of soft plastic at the front to prevent damage to furniture and other objects. The wide floor nozzle of the VC 6 Cordless ourFamily is in particular suitable for the quick cleaning of large areas and is additionally equipped with an LED light. Dust and dirt can thus be better detected and vacuumed up in dark areas, for example when vacuuming under cupboards.

Storage of the devices requires very little space. They can be mounted on the wall in niches and also in cupboards. The vacuum cleaner is then kept out of sight, but at all times charged up and ready at hand.

Both devices are offered in a yellow standard and in a white premium version with additional accessories. For the VC 6 Cordless Premium ourFamily, among other things a second battery for double runtime, as well as air filters and a filter cleaning tool, are also available.

KÄRCHER

PRESS RELEASE

Kärcher presents two new battery-powered vacuum cleaners that are suitable both for quick intermediate cleaning and for the weekly house cleaning.

The first thing you notice is the slim and practical design. The entire technology is accommodated in the very compact handpiece, which means it can also be used as a handheld vacuum cleaner.
